COMMODITY TRADE OF INDUSTRIAL SECTOR WITH THE UNITED STATES

Historical Summary 1966-1981

Approved as a review of Canada's industrial sector, as classified by the industrial sector for the year 1981. The information shows total exports (including total imports and re-exports) and value basis.

Canada's merchandise trade statistics are recorded and compiled by Statistics Canada following commodity classification. In this review, data have been placed on the more specific export and import to the industrial sector, as well as re-exports to Canada, which could be used by Canada.

HISTORICAL SUMMARY
1966-1981

The review is a historical summary of the commodity trade between Canada and the United States. It should be noted that the data included in the data for the year 1981 are preliminary. These data should not be used to estimate the balance of trade. The latter is only strictly approximate as a balance of trade basis.

This review, prepared by the Economic Intelligence Directorate, is intended to provide a historical summary of the commodity trade between Canada and the United States. It is intended to provide a historical summary of the commodity trade between Canada and the United States.

COMMODITY TRADE BY INDUSTRIAL SECTOR WITH THE UNITED STATES

Historical Summary 1966-1981

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1981. The tabulations show total exports (including re-exports), total imports and re-exports customs value basis.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups, i.e., exports to the industries which have produced or manufactured these commodities in Canada, and the imports to those industries in Canada which could or would produce or manufacture these commodities in Canada.

The revised 1970 Standard Industrial Classification issued by Statistics Canada in December 1970 is the framework used. Particular commodity groups within industries are also shown at various points in the tabulation.

It should be emphasized that although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the balance of trade. The latter is only strictly appropriate on a balance of payments basis.

This report, produced from Statistics Canada latest records, supercedes the previous "Commodity Trade by Industrial Sector, Historical Summary, 1966-1980" issued by the Economic Intelligence Branch, Economic Policy and Analysis, Department of Industry, Trade and Commerce in July 1981.

COMMODITY TRADE BY INDUSTRIAL SECTOR WITH THE UNITED STATES

Historical Summary 1966-1983

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1983. The tabulations show total exports (including re-exports) and total imports on a customs value basis.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups, i.e., exports to the industries which have produced or manufactured these commodities in Canada, and the imports to those industries in Canada which could or would produce or manufacture these commodities in Canada.

The revised 1970 Standard Industrial Classification issued by Statistics Canada in December 1970 is the framework used. Particular commodity groups within industries are also shown at various points in the tabulation.

It should be emphasized that although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the balance of trade. The latter is only strictly appropriate on a balance of payments basis.

This report, produced from Statistics Canada latest records, supercedes the previous "Commodity Trade by Industrial Sector, Historical Summary, 1966-1982" issued by the Statistical and Data Base Services Directorate, of the then Regional and Industrial Policy and Small Business, Department of Industry, Trade and Commerce/Regional Economic Expansion in August, 1983.

COMMODITY TRADE BY INDUSTRIAL SECTOR WITH THE UNITED STATES

Historical Summary 1966-1984

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1984. The tabulations show total exports (including re-exports) and total imports on a customs value basis.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups, i.e. exports to the industries which have produced or manufactured these commodities in Canada, and the imports to those industries which could or would produce or manufacture these commodities in Canada.

The revised 1970 Standard Industrial Classification issued by Statistics Canada in December 1970 is the framework used. Particular commodity groups within industries are also shown at various points in the tabulation.

It should be emphasized that, although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the balance of trade. The latter is only strictly appropriate on a balance of payments basis.

This report, produced from Statistics Canada latest records, supercedes the previous "Commodity Trade by Industrial Sector, Historical Summary, 1966-1983" issued by the Statistical and Data Base Services Directorate, Department of Regional Industrial Expansion, in the Fall of 1984.
